Matt, very pleased to see the progress with Starfleet expanding its fleet. Looking forward to the commissioning of the USS FREEDOM later this month. Warp Four is a pretty big milestone. Now on to Warp Five!

I am sending you a dossier on a hard charger we have over here: Dr. James Artellan. He just finished a tour as an engineering officer onboard one of our science ships and has expressed a desire to join Starfleet. I think he would be a great asset and ask that your recruiting people take a look.

Let's all continue going bolding where no man has gone before!

//S//Dr. Claude Edison, Deputy Administrator of Engineering, United Earth Space Probe Agency
